SUMMARY

Highly motivated final-year Computer Science student specializing in Cloud Technologies. Dedicated to designing, implementing, and securing innovative cloud solutions with a focus on Cloud Architecture. Proven experience building full stack applications and resilient systems for areas with poor connectivity.

EDUCATION

Staffordshire University - United Kingdom **Nov 2024 - Present**

BSc. (Hons) Computer Science (Cloud Technologies)

Predicted Grade: First Class with Honours

APIIT LANKA Computing Foundation **Feb 2024 - Oct 2024**

Successfully Completed

Royal College - Colombo 07 **Jan 2010 - Jan 2024**

G.C.E Advanced Level Examination (Physical Science) **Jun 2021 - Jan 2024**

PROJECTS

- **Nestlé Finance Command Centre - *Full Stack Developer, Scrum Master & Quality Assurance:*** Building a complete AI-driven Procure-to-Pay platform (React, Node.js, Supabase) to automate enterprise financial workflows. Integrating Vision LLMs to extract document data for automated 3-way matching. Engineering advanced financial workflows, including automated payout scheduling, early payout, and a real-time vendor dispute resolution hub for Nestlé Lanka.
- **NexaCart Enterprise Cloud Migration - AWS EC2, Auto Scaling, ALB, RDS Multi-AZ, CloudFormation, Route 53:** Designed an AWS environment for a high-traffic e-commerce platform that stays online during traffic spikes and regional outages. Built a 3-tier architecture (web, application, database) with automatic scaling, load balancing and a database replicated across availability zones, and automated the full setup with AWS CloudFormation (Infrastructure as Code) for consistent deployments. Added a cross-region Warm Standby Disaster Recovery plan with Route 53 DNS failover and secured it with tiered Security Groups and network segmentation. The service recovers in 15 to 30 minutes (RTO) with less than 1 hour of data loss (RPO).
- **Freshmart - AWS VPC, S3, RDS, DynamoDB, IAM, NAT Gateway:** Designed a low-cost, fault-tolerant and secure AWS environment for the Freshmart application. Built a 3-tier VPC with cross-availability-zone redundancy and NAT Gateways, hosted the static website on S3, and combined RDS and DynamoDB databases to reduce cost. Applied IAM least-privilege access and automated EC2 server setup with User Data scripts. The application remains available if one data centre fails.
- **Aegis Responder - Offline-First Disaster Response System (PWA, JavaScript, PHP, MySQL, Service Workers) - APIIT Hackathon 2025:** Built a disaster-response app for areas with no internet or only 2G coverage. Developed a Progressive Web App (PWA) with a store-and-forward sync engine that saves data on the device and uploads it automatically when a connection returns, plus a custom Service Worker for full offline access ("Airplane Mode"). The app works with zero connectivity and syncs reliably over 2G networks.

CERTIFICATIONS

AWS Certified Cloud Practitioner **Oct 2026**
Agile Project Management in ICT Projects by University of Moratuwa (CODL) **Sep 2026**
AWS Certified AI Practitioner **Aug 2026**
DevOps Professional Certificate by PagerDuty and LinkedIn **Nov 2025**
PCEP - Certified Entry-Level Python Programmer by OpenEDG Python Institute **Dec 2024**

EXPERIENCE

Database Engineering Intern - Onsys Technologies (Melbourne, Australia, Remote) **Oct 2026 - Present**

- Completing a 12-month remote internship in database engineering and infrastructure support, with structured training, mentoring and quarterly performance reviews
- Building foundations in Microsoft SQL Server, Oracle and PostgreSQL, covering administration, backup and recovery, security and high availability
- Assisting senior engineers with database monitoring, patching, troubleshooting and Windows and Linux server support
- Writing SQL queries and automation scripts (PowerShell, Bash, Python) and gaining exposure to Microsoft Azure

RCOMS - Royal College Colombo 07 ***Jun 2021 - Aug 2022***

Assistant Chairman - Awarded an A-Grade

- Co-managed society operations and led end-to-end delivery of high-profile media projects.
- Served as main contact for external sponsors and OBA officials, negotiating and turning plans into executed events.
- Strengthened cross-functional communication, negotiation and project planning skills.

TECHNICAL SKILLS

- **Cloud/DevOps & Version Control:** AWS (EC2, S3, RDS, DynamoDB, VPC, IAM, CloudFormation, Route 53, Auto Scaling, Load Balancer), Infrastructure as Code, Disaster Recovery, High Availability, Docker, Git, GitHub, Bash scripting.
- **Programming:** Python, JavaScript (ES6+), Node.js, Express.js, C#, PHP
- **Web/Mobile Development:** React, HTML5, CSS3, Tailwind, Bootstrap, Flutter.
- **Databases:** MySQL, MS SQL Server, PostgreSQL, DynamoDB, Amazon RDS
- **Other:** AI/ML (Vision LLMs, OCR), Cybersecurity (Kali Linux), API Development (Postman), Agile/Scrum, Technical Documentation.

SOFT SKILLS

Agile Methodologies, Problem-Solving, Critical Thinking, Cross-Functional Teamwork, Adaptability, Willingness to learn, Effective Communication, Troubleshooting, Technical Documentation, Leadership, Negotiation, Project Planning, Strong Work Ethic.
